

Matt Wade, CEE Senior student, received the 2008 ASCE Robert Marr Technical Paper Award

Matt Wade, senior student at the Civil and Environmental Engineering Department (CEE), graduating in May 2008, won the 2008 Robert Marr Technical Paper Award from the Virginia Section of the American Society of Civil Engineers (ASCE).

The technical paper competition was conducted as part of the regional steel bridge competition, where students from seven universities in the Washington DC metropolitan area compete together. The GW 2008 steel bridge team was supervised by Professor Majid Manzari.

Matt's technical paper was developed in CE206 "Design of Reinforced Concrete Structures" under the supervision of Professor Sameh S. Badie.
